

Policy Statement Management

CCI Leidingsystemen® (CCI) wants to be a preferred reliable partner for her clients in the chosen markets with products and services that meet the contractual and legal requirements. For this purpose it is essential to focus on distinctive capacity and innovative customer-focused solutions which will ensure profitability and continuity. Constant focus on safety, competence, reliability, speed, accuracy and flexibility will lead to customer satisfaction and long term relationships.

The condition for CCI to live up to this policy relies heavily on the ability to organize solid planning and project control. The integrated Quality, Health, Safety and Environmental management system describes the methods of project control and has been laid out to meet as a minimum the requirements of ISO9001:2015 and VCA* 2017/6.0 and aims for continuous improvement of the operational management performances.

By implementation of the General Data Protection Regulation, the privacy of both our customers and employees has been emphasized even stronger than before within CCI.

The strong conviction that our employees form the true capital of CCI, gives continuous focus on creating a safe and healthy working environment. We comply with the Dutch Health and Safety Act and the Dutch working conditions decree.

In our operational management we specifically pay attention to Safety, Health and the Environment. By optimizing the working circumstances and solid personal supervision we aim for a high employee satisfaction and minimal sick leave.

When internal developments, changing laws and standards or changes in technique, health or environmental care demand it, we will refine our policy. All personnel will be informed about our policy once a year or shortly after relevant changes in our policy have been implemented.
